Brine Maker System

Brine Pro™ 2000

Now, just about anyone can make brine. That's because the Brine Pro 2000 system simplifies production with user-friendly operation, automatic salinity control and easy no-splash salt refilling. Plus, the system is compatible with low-flow water input and 220VAC electrical sources that are available in most shops. Backed by a 2-year warranty, the BP-2000 is a cost-effective, patent-pending solution for producing de-icing material. It doesn't get easier than this.

Features

Hammer Mill Salt Grinder

The hammer mill salt grinder is designed to create consistent particle sizes, which accelerates the dissolve rate and expedites clean-out.

Dry Hopper System

Unlike most other brine makers, you don't have to dump salt into the mixing chamber. Just add it into the 1-cubic-yard dry hopper, and the BP-2000 will take it from there. The hopper offers visual salt level indication, letting you know when it's time to refill.

Automatic Salinity Control

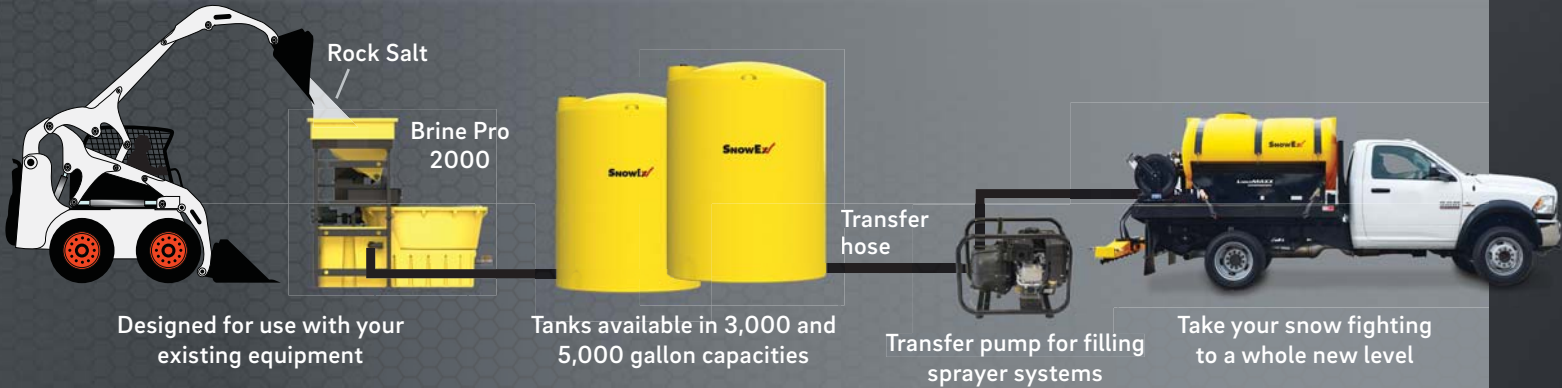

In order for brine to be effective, it needs to have the correct amount of salt and water. Thanks to automatic salinity control – made even easier with an intuitive touchscreen panel – the operator can sit back and let the machine do the work.

Mixing Chamber With High Circulation Pump

The mixing chamber includes a high-volume circulation pump. This feature helps ensure a uniform brine mixture up to 1,050 gallons per hour (3,974.7 L/h).

The Complete Brine Making System

Designed for use with your existing equipment

Tanks available in 3,000 and 5,000 gallon capacities

Transfer pump for filling sprayer systems

Take your snow fighting to a whole new level

	DIMENSIONS				CAPACITY				INPUT REQUIREMENTS	
	Empty Weight	Overall Length	Overall Height	Overall Width	Mixing Tank	Brine Tank	Hopper Volume	Brine Production	Inlet Flow Rate	Electrical Connection
BP-2000	1,520 lb (680.4 kg)	100" (254.0 cm)	89" (226.0 cm)	86" (218.4 cm)	265 gal (1,003.0 L)	285 gal (1,078.8 L)	1 cu yd of salt (0.765 cu m)	Up to 1,050 gal/h (Up to 3,974.7 L/h)*	Up to 15 gal/min (56.8 L/min)	220VAC, single phase

*Includes salt

NOTE: For best results use pure white clean salt with no additives.
